

I am a widow, 60 yrs. of age, with 30 yrs. of cronic back pain, and also now have heart problems. When the phone rings it is terribly painful for me to get out of a chair, or out of bed to go answer. My family and friends know this so they only call when it's as emergency, or when they know I'm up. I don't want things to go back to the way they were before the no call was instituted, that was a miracle for me and I'm sure thousands of other seniors with health problems. Thank You, you'll be in my prayers.
